Course Description: Navigating the AI Revolution is a 3-hour comprehensive course that provides an in-depth understanding of AI's evolution, applications, and implications in project management. Participants will explore various types of AI and its real-life applications across industries, such as marketing, pharmaceuticals, business, and healthcare. The course also discusses using AI tools like Chatbots, Project Intelligence, and Machine Learning in project management. Additionally, it addresses the ethical and strategic considerations of augmenting human abilities with AI and offers insights into building an enterprise AI strategy.

Method of teaching: Students will learn tips, techniques and processes through webinars, which can be accessed 24/7 and completed at their own pace. Remember, though, that you must complete the course within 60 days.

Course Objectives:

Objective 1: Define Artificial Intelligence, understanding its fundamental concepts and capabilities

Objective 2: Trace the evolution of AI and recognize its impact on the project management landscape

Objective 3: Identify and evaluate various types of ChatBots and their applications in project management

Objective 4: Examine the fears associated with AI and AI Phobia, and understand the importance of addressing biases in AI

Objective 5: Explore real-life applications of AI in marketing, pharmaceuticals, business, and healthcare

Objective 6: Analyze the role of AI tools like Project Assistant, Project Intelligence, and Machine Learning in project management
